Education

Lakshmi Narain College of Technology, Bhopal

B.Tech – Computer Science (C.S.E)

Sep 2022 – Jul 2026 (Expected)

Sun Shine H.S. School, Dewas

Class XII | 93.4% | 2021

Experience

Aadrila Technologies – Frontend Intern

Jun 2024 – Jul 2024

- Developed responsive React.js interfaces from production UI designs using Tailwind CSS.
- Built reusable components and implemented smooth animations to improve user experience.

Projects

FableForge | React.js, Node.js, MongoDB, TypeScript, JWT, Razorpay, AWS S3

[ProjectLink](#)

- Built a full-stack e-book platform with **JWT-based authentication and role-based access control**, enabling readers to browse, purchase, and read books while authors create, manage, and publish content.
- Developed **RESTful APIs** for authentication, book management, orders, reviews, and purchase history; integrated **Razorpay** for secure payments and **AWS S3** for file storage and media uploads.
- Implemented **secure content delivery**, protected routes, and purchase-based authorization to ensure only authorized users can access premium e-books.
- Designed a responsive React frontend with reusable components, optimized API interactions, and state management to deliver a seamless reading and publishing experience.

Personal Blogging Website | Next.js, Node.js, MongoDB, Tailwind CSS, JWT

[ProjectLink](#)

- Built a full-stack blogging platform with **JWT-based authentication**, role-based authorization, and complete CRUD functionality for creating, editing, deleting, and managing blog posts.
- Developed RESTful APIs with **pagination, search, filtering, and image uploads**, improving scalability and user experience for content management.
- Implemented protected routes, secure authentication, and responsive UI using Tailwind CSS; deployed the application on **Render** for production use.

Real-Time Collaborative Code Editor | Node.js, Socket.io, Judge0 API, Monaco Editor

[ProjectLink](#)

- Built a real-time collaborative code editor using **Socket.io**, enabling multiple users to edit code simultaneously with low-latency synchronization and live updates.
- Integrated **Monaco Editor** and a multi-language code execution system using the **Judge0 API**, supporting secure compilation and execution across multiple programming languages.
- Designed scalable backend APIs for room management, real-time event handling, and session synchronization, ensuring a seamless collaborative coding experience.

Skills

Languages: C++, JavaScript, TypeScript

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, Docker, Linux

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks
